I am a self-motivated and driven software developer. Software development has focused my passion for problem solving and overcoming user/customer problems as well as writing clean, robust and maintainable code. What I love most about programming is the constant learning and improving in my career. I also enjoy learning any new languages in which I am exposed to. I frequently get involved in mentoring others who took the leap I did and have chosen the same career path I have taken. Front End Development is where my passion lies in coding and I am always looking for new tech to learn.

Technical Skills

- **Languages:** JavaScript, TypeScript, CSS3, LESS, HTML5, Java, Python, Ruby, SQL, Perl.
- **Frameworks:** AngularJS, Angular2(Angular8), ReactJS
- **Other Technologies:** NodeJS, Webpack, Lodash, Spark, Express, Sinatra, Hibernate, PostgreSQL & NoSQL Databases, Git, Jira

- Performed water chemical balance tests prior to and after swim lessons

Qualifications & Training

Mar/2018 - July/2018 - CodeClan

During my time here I undertook a 16 week software development course. I learned working in a broad range of various technologies. I produced a number of projects, either solo, in a pair or with a group and did so while meeting challenging deadlines with project specs. I gained a great deal of practical experience and the ability to learn new languages and tools at an accelerated pace as well as the soft skills needed to find success working within a team of developers. The major projects produced can be found via my github account.

Other

- Higher Business Management
- 3 Intermediate Grades
- 5 Standard Grades

- UKCC Level 1 and 2 Coaching & Teaching Aquatics
- Qualified First Aider (most recently updated in November 2017)
